### *Schedule 3 – Open Access Workflow*

1. Author submits article via the standard submission process on Taylor & Francis Online.
2. Peer Review of the article:
  - a) Rejection: T&F informs Author;
  - b) Acceptance
    - Corresponding author identified as affiliated to an Institute (Schedule A). This will happen at acceptance (as the manuscript enters the Production system) and will be by either email domain or by Organisation name (as included in the list specified in Schedule A). The identification of authors is dependent on them entering this information at submission (using Institution's email address or entering the Institute name as Organisation). Should the author's affiliation change, the author should inform the Publisher ensuring that their current affiliation information is correct at acceptance.
    - Institutions will be informed and will verify the eligibility of an article as quickly as possible to ensure the timely production and publication.
    - Only articles verified by Institutions may benefit from the APC waiver as described in clause 10 (Terms of Publication)
3. Accepted article metadata feeds into the Research Dashboard. Each institution is able to log into their Research Dashboard account and verify the eligibility of the article to be published open access under this agreement. The metadata includes but may not be limited to: DOI, journal name, article title, corresponding author name, corresponding author email address, acceptance date, OA journal profile, article type, ORCID ID and funder (if provided by the corresponding author).
4. Author is sent an email from Taylor & Francis Production team with a URL to the Electronic Copyright System, where they are able to select and sign the Creative Commons Licence online.
5. Article is published online under an Open Access licence.
6. The version of record of Qualifying articles published subject to this Agreement's Terms of Publication (clause 9), shall include a note stating "Open access funding provided by Irish Research eLibrary"
7. If a Qualifying Article is published subscription (i.e. not open access), the Publisher agrees to convert the article to open access subject to this Agreement's Terms of Publication (clause 9), with the consent of both the author and the Member. For clarity, such conversion of articles to OA post-publication will use the Publication Cap and will only be possible if the Publication Cap of the relevant calendar year is not already exhausted.

### **General**

Publisher is keen to work with Organisation to advocate open access publishing and promote this agreement to researchers within IReL. This will be through tailored email communications to authors, webinars and events, to be decided mutually and organised collaboratively.

The Publisher delivers article metadata to CrossRef upon online publication for all articles. Open access license data is encoded within our article metadata, enabling the deposit of license metadata to CrossRef and other partners to whom the Publisher distributes article metadata.

### Eligible Article Types

The eligibility for article types in this agreement includes all core content. This includes, but is not limited to, the list below

Article
Review
Research Article
Review Article

### 8. Annual Account performance reports

**The Publisher will report annually on:**

1. the Publisher's journals that have flipped during the year from/to a subscription model to/from an open access model, including hybrid model,
2. the proportion of articles published open access in each of the Publisher's journals.

**The Publisher shall provide annual reports on all articles editorially accepted for publication during the year which are written by Eligible Authors and are either:**

1. published OA in conformity with this Agreement; or
2. published open access but not in conformity with this Agreement (e.g. author paid the APC or the Publisher waived APC); or
3. published subscription (not open access) during the Term.

**The annual reports shall cover the previous calendar year and shall be delivered in the first quarter of the following year.**

**This report shall be provided both in machine readable form in a structured format as comma separated value file format (csv) and in human readable format.**

For clarity: (a) the date of entering the production system (CATS) refers to the point at which the article is given a DOI and the author is sent an author publishing agreement to complete, and (b) the Entered Date field in the Publisher's OA dashboard reports corresponds to the date of entering.

The previously held core subscriptions are defined in the 24 March 2023 addendum to the Agreement between the parties initially dated 24 March 2021..
- iv. Perpetual rights are given to the volume year of purchase only. Such that in 2021, perpetual rights are given to the content published only in the volume year 2021 for those titles.
- v. Previously acquired perpetual rights are unaffected by this agreement.
- vi. Read access is given back to 1997, where available

- vii. The Read & Publish Fees include read access to the titles listed in Schedule 2 for all institutions listed in Schedule 1.
